DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Rejections set forth previously under this section are withdrawn in view of the amended claim.

Allowable Subject Matter

2. Claims 30-53 are allowed.
3. The following is an examiner's statement of reasons for allowance:

As to Claim 30, the prior art does not teach or fairly suggest the claimed subject matter, and particularly the steps of selecting at least one dehydrated reef organism, wherein the dehydrated reef organism comprises a dehydrated marine animal, forming a mold of the at least one dehydrated reef-organism, molding at least one reef-organism structure, and adhering the at least one reef-organism structure to the reef-like formation to produce a reef artifact form.

As to Claim 47, the prior art does not teach or fairly suggest the claimed subject matter, and particularly the steps of selecting at least one real or simulated reef organism, forming a mold of each of the at least one real or simulated reef organism, molding at least one reef-organism structure, and adhering the at least one reef-organism structure to the reef-like formation to produce a reef artifact form.

As to Claim 50, the prior art does not teach or fairly suggest the claimed subject matter, and particularly the steps of selecting a plurality of dehydrated reef organisms, each comprising a dehydrated marine animal, forming a rubber negative mold of each of the plurality of dehydrated reef organisms, pouring a wax into each of the rubber negative molds to form the reef-organism

structures, and adhering the at least one reef-organism structure to the reef-like formation to produce a reef artifact form.

As to Claim 51, the prior art does not teach or fairly suggest the claimed subject matter, and particularly the steps of selecting at least one real or simulated reef organism, forming a mold of each of the at least one real or simulated reef organism, molding at least one reef-organism structure, and adhering the at least one reef-organism structure to the reef-like formation to produce a reef artifact form.

The most pertinent references are Virgili (USPN 4496511) for its teaching regarding adhering of rocks and making negative molds, and Hudson (USPN 5215406) for its teaching regarding covering a surface with living coral species. However, these references do not provide the steps described above, namely the steps of forming a mold of a real or simulated organism or animal, forming a structure in the mold, and adhering the structure to a formation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
